

## Brief Motivation

This app aims to streamline and simplify the administrative work for faculty by automating the process of project allocation. It reduces the need for manual Excel-based work, making the project allocation process more efficient and convenient for both students and faculty members. Additionally, the system ensures transparency and reduces bias by enabling administrators to oversee and monitor all processes, ensuring a fair and unbiased allocation of projects.

## Objective

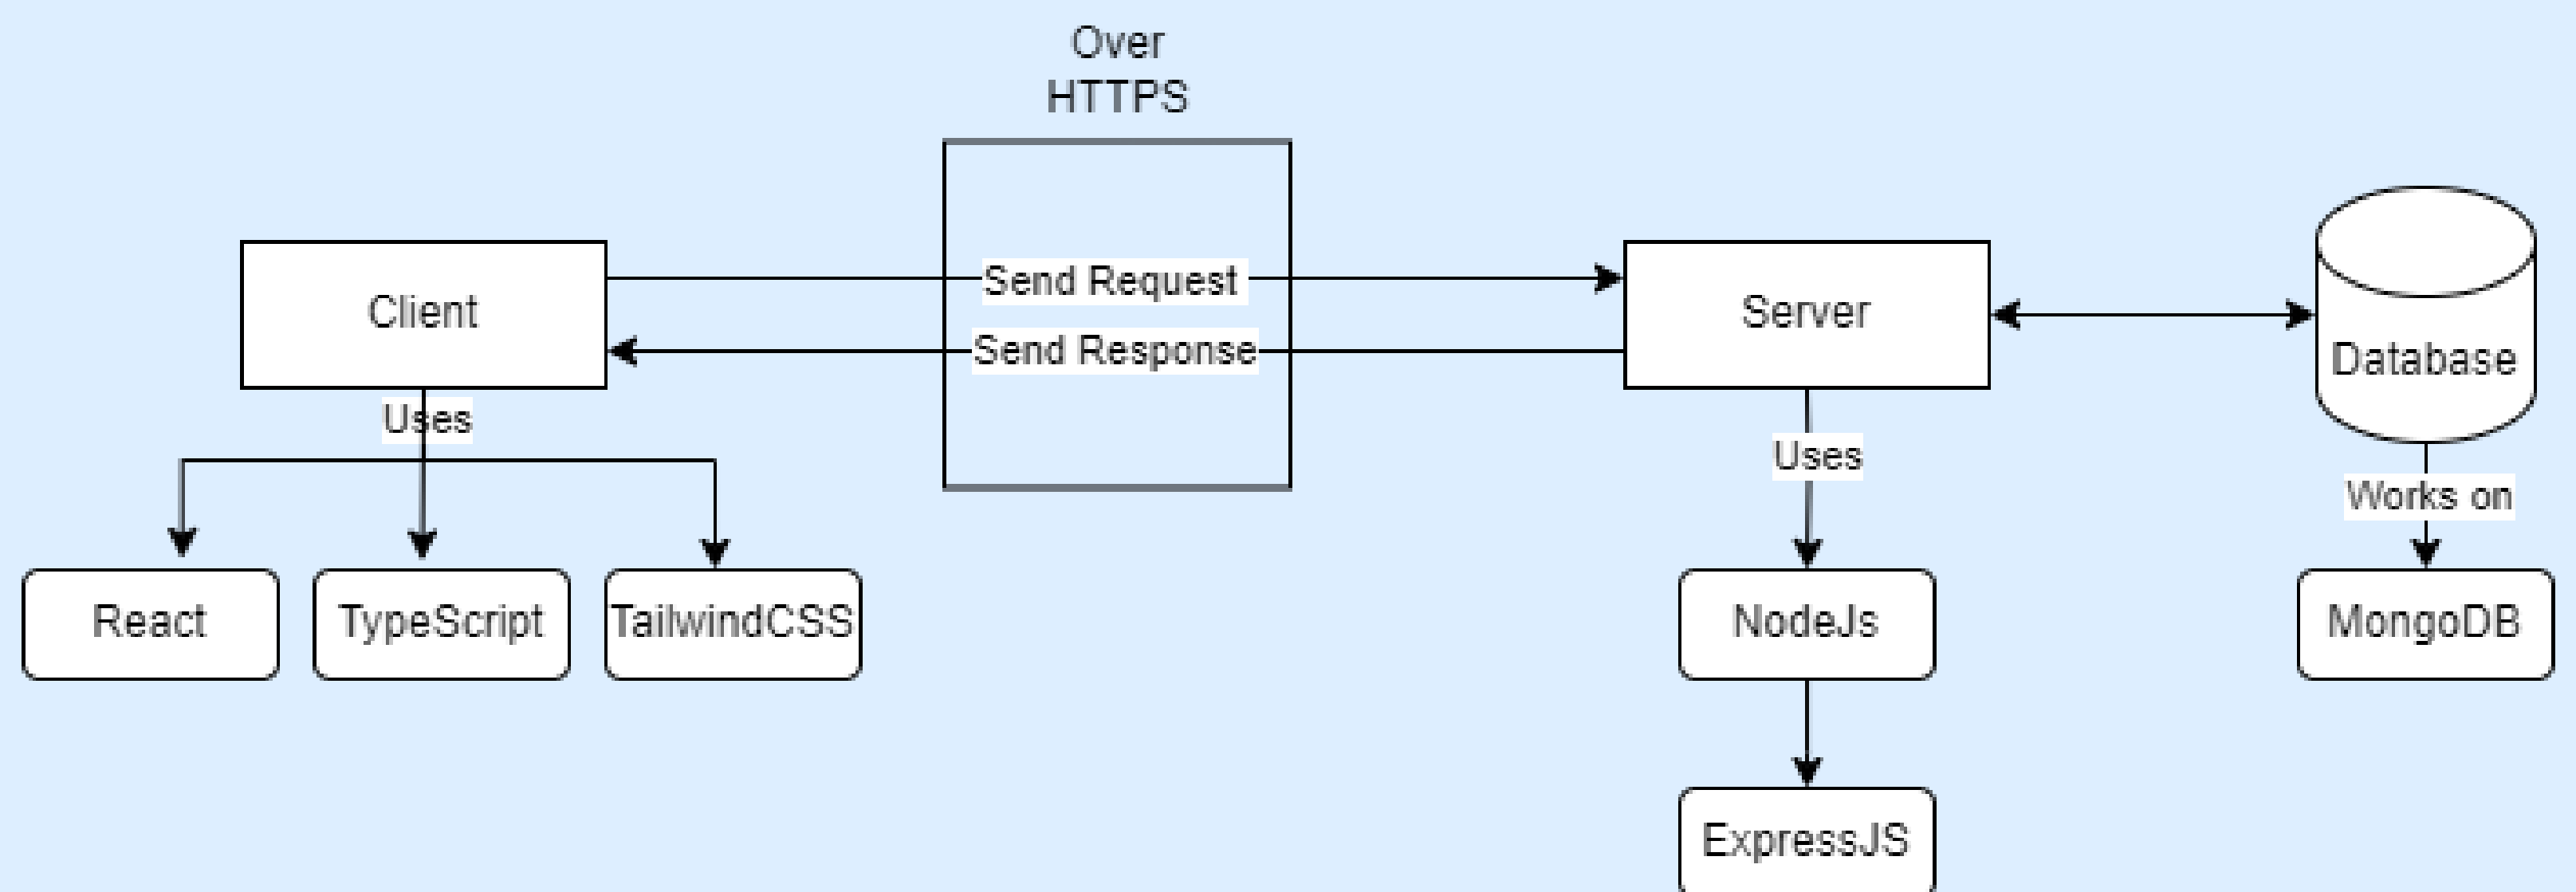

- To introduce a web application that:
  - Centralizes Final-Year projects management.
  - Streamlines mentor-student interactions.
  - Provides role-based access for tailored experiences.
  - Ensure transparency and reduce bias in the project allocation process.
  - Reduce the reliance on manual Excel-based work.
